Reviewer’s report

Title: WWOX protein expression varies among ovarian carcinoma histotypes and correlates with less favorable outcome.

Version: 4 Date: 2 June 2005

Reviewer: kay huebner

Reviewer’s report:

General
I find the authors' replies responsive, though it may be useful for them to explain in the text that the methods for scoring cytoplasmic and nuclear proteins are different and reflect those recommended by the maker of the machine—or something like that

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
