Reviewer's report

**Title:** Cytokeratin 8/18 expression indicates a poor prognosis in squamous cell carcinomas of the oral cavity

**Version:** 2  **Date:** 5 October 2005  
**Reviewer:** Vera C Araujo

**Reviewer's report:**

The authors have presented the figures as recommended. Nevertheless the authors must review the staining procedure described in Method, since staining with diaminobenzidine is present only in figure 1 a.

The answers to the comments of the reviewer are sufficiently convincing. Therefore I agree with the publication of the paper.
