Reviewer's report

Title: Intraluminal instillation of urokinase and autologous plasma: a method to unblock occluded central venous ports

Version: 2 Date: 4 December 2005

Reviewer: Jeff Szer

Reviewer's report:

General

------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

1. The language and style of the submission makes comprehension of the data quite difficult and requires extensive revision.

2. Details of the individual subjects in the study should be demonstrated in a table.

3. Do not confuse methods with results (“after several "frustran" (sic) attempts” does not belong in the methods section).

------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

------------------------------------------------------------------------------------------------------------------------

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of limited interest

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No
