Reviewer's report

Title: Intraluminal instillation of urokinase and autologous plasma: A method to unblock occluded central venous ports

Version: 3 Date: 4 March 2006

Reviewer: Jeff Szer

Reviewer's report:

General

---------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

---------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Correct spelling of "mammary" and "doxorubicin" in the table. Folic acid could be removed as a therapeutic agent from the table.

---------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

---------------------------------------------------------------------------------------------------------------------------------

What next?: Accept after minor essential revisions

Level of interest: An article of limited interest
