Reviewer’s report

Title: Somatic VHL gene alterations in MEN2-associated medullary thyroid carcinoma

Version: 3 Date: 28 April 2006

Reviewer: Attila Patocs

Reviewer’s report:

General
The authors have provided answers for the requested informations; therefore the manuscript is now suitable for publication with this minor revision.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
In Figure Legends should be including the note for Figure 4 (normal sequence) or it is possible to present the normal and mutant sequences in the same Figure (for example: Figure 3, panel A and B).

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
