Reviewer’s report

Title: Somatic VHL gene alterations in MEN2-associated medullary thyroid carcinoma

Version: 3 Date: 5 May 2006

Reviewer: rossella elisei

Reviewer’s report:

General
Although the authors did not answer to all the questions that I made, I understand the difficulties they had to collect more samples thus I suggest to accept their paper

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
