Reviewer's report

Title: Over-expression of Eph and ephrin genes in advanced ovarian cancer: ephrin gene expression correlates with shortened survival

Version: 2  Date: 18 May 2006

Reviewer: Mark S Duxbury

Reviewer's report:

General
No comments

------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
No comments

------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
No comments

------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
The small sample size remains a significant limitation of this study.

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes
