Reviewer's report

Title: Tamoxifen is not effective in good prognosis patients with hepatocellular carcinoma

Version: 1 Date: 14 June 2006

Reviewer: antonio grieco

Reviewer's report:

General
The Authors using a widely valitated model of trial show clear figures on the lack of benefit on survival for those patients who received tamoxifen. This study makes a definitve sentence confirming the uselessness of tamoxifene for the treatment of the hepatocellular carcinoma.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No
