Reviewer’s report

Title: Paclitaxel and concomitant radiotherapy in high-risk endometrial cancer patients: preliminary findings.

Version: 5 Date: 1 June 2006

Reviewer: Krystyna Serkies

Reviewer’s report:

Re: 7099848898699014
All my comments have been included.
- Major Compulsory Revisions - no
- Minor Essential Revisions “The only one I suggest is to change the word “acute” toxicity for “delayed” toxicity as according to criteria of Perez and Brady (Principles and practice of radiation oncology) late reactions were considered to be those occurring after 90 days from the completion of RT. Also in the Abstract “result section the sentence “A total of 157 concomitantly with RT” should be corrected as 157 P cycles covered both concomitant and consolidation P, not only concomitant as the author stated.
- Discretionary Revisions “no
- The next step I suggest is that the manuscript should be accepted after minor essential revisions.
- Level of interest “An article of importance in its field
- Quality of written English “Acceptable
- Statistical review “No
I declare that I have no competing interests.
Krystyna Serkies MD PhD

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
