Reviewer’s report

Title: Prognostic significance of MCM2, Ki-67 and gelsolin in non-small cell lung cancer

Version: 4 Date: 25 July 2006

Reviewer: Richard Holubkov

Reviewer’s report:

General

Your responses to the critiques were very well thought-out and appropriate. Thank you!

--------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

NONE

--------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

NONE

--------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

For readers not familiar with approaches to handling non-proportional hazards, you may wish to add references to the time-dependent covariate approach and the Breslow test, when you discuss these in Methods on page 10.

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
