Reviewer’s report

Title: Frequency, prognostic impact, and subtype association of 8p12, 8q24, 11q13, 12p13, 17q12, and 20q13 amplifications in breast cancers

Version: 2 Date: 5 October 2006
Reviewer: Larissa Savelyeva

Reviewer’s report:

General
The authors made an appropriate changes and revised the paper according to my previous comments. I think that the manuscript is acceptable for publication in BMC Cancer.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision
Level of interest: An article of importance in its field
Quality of written English: Acceptable
Statistical review: No
