Reviewer's report

Title: Celecoxib decreases prostaglandin E2 concentrations in nipple aspirate fluid from high risk women and women with breast cancer

Version: 1 Date: 6 July 2006

Reviewer: William Dooley

Reviewer's report:

General
Excellent paper; well written. I agree that it is too bad that we do not know the menstrual cycle position of the pre-menopausal women but your analysis and design is otherwise flawless.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable
