Reviewer's report

Title: SnoN expression is differently regulated in microsatellite unstable compared with microsatellite stable colorectal cancers

Version: 2 Date: 7 September 2006

Reviewer: Carla Oliveira

Reviewer's report:

General

The authors addressed all the comments from the reviewers and the paper did greatly improve.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

In the Results section addressing TGFβRII mutation, Table 2 should be mentioned.

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
