Reviewer’s report

Title: Heterogeneity of mammary lesions represents molecular differences

Version: 4 Date: 14 November 2006

Reviewer: Kornelia Polyak

Reviewer’s report:

General
although the authors did not perform any of the specific experiments the reviewers asked for, they referred to their prior published data and provided sufficient clarification of the data, thus, this makes this manuscript acceptable for publication.

----------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None

----------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
None

----------

Discretionary Revisions (which the author can choose to ignore)
None

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
