Reviewer’s report

Title: A novel mutation in the tyrosine kinase domain of ERBB2 in hepatocellular carcinoma

Version: 2 Date: 7 October 2006

Reviewer: Balazs Halmos

Reviewer’s report:

General
The authors responded appropriately to the questions raised and clarified technical concerns. The manuscript remains limited in scope, in particular without any attempts at functional characterization but appears worthy of publication.

------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
