Reviewer's report

Title: Many Quality Measurements, But Few Quality Measures Assessing the Quality of Breast Cancer Care in Women: a systematic review

Version: 2 Date: 5 September 2006

Reviewer: Geertruida De Bock

Reviewer's report:

General
This is a nice analysis

------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

------------------------------------------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
'I declare that I have no competing interests'
