Reviewer's report

Title: Prognostic significance of multidrug-resistance protein (MDR-1) in renal clear cell carcinomas: a five years follow-up analysis.

Version: 4  Date: 7 December 2006
Reviewer: Rodolfo Montironi

Reviewer's report:

General

--------------------------------------------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None

--------------------------------------------------------------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
1. The word immune-histochemistry should be replaced with immunohistochemistry
2. Page 4. Sentence starting with “Histological reports regard…” What do the authors mean with “site”? Was it included in the study?

--------------------------------------------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore)
1. The comparison with the Robson staging system could be omitted.

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
