Reviewer's report

Title: Understanding the Attitudes of the Elderly Towards Enrolment into Cancer Clinical Trials

Version: 4 Date: 20 December 2005

Reviewer: Peter M Ellis

Reviewer’s report:

General
I feel the authors have addressed the issues raised by the reviewers as well as they can. Some of the issues relate to methodological limitations of the study and this clearly can not be changed at this point. However, I would agree that the subject matter is important and the message is also important.

I do not have any additional concerns to raise

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
