Reviewer's report

Title: Elevated expression of VEGFR-3 in lymphatic endothelial cells from lymphangiomas

Version: 4 Date: 16 January 2007

Reviewer: Peter Sydney Mortimer

Reviewer's report:

I am sorry to be difficult but the authors' need to make life as easy as possible for each reviewer by citing in a covering letter and in the manuscript exactly, how and where they have responded (to reviewers' comments). The manuscript needs to be compared as it was to its revised version. I haven't got the time to read afresh nor have I the time to search for changes made.

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:

I declare that I have no competing interests.
