Reviewer's report:

General

The authors have incorporated the major revision and 2/4 minor revisions that were suggested. There were two minor revisions which were not changed (comments number 3 and 5) however I do not feel that these significantly alter the intent or clarity of the paper

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
