Reviewer's report

Title: A full scale comparative study of methods for generation of functional Dendritic cells for use as cancer vaccines

Version: 3 Date: 3 June 2007

Reviewer: Marc Dauer

Reviewer's report:

General

----------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
The authors have sufficiently answered the points made in the initial review.

----------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
pg. 1, line 15 "were" instead of "was"
pg.2, line 7 "start" instead of "starts"
pg. 6, line 16 "have" instead of "has"

----------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
None

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
