Reviewer's report

Title: Association of diminished expression of RASSF1A with promoter methylation in primary gastric cancer from patients of central China

Version: 2 Date: 21 May 2007

Reviewer: Simo Schwartz Jr

Reviewer's report:

General

Even though the authors have not fully addressed some of my questions I am satisfied with the improvements made so I would accept without further review.

-----------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
