Title: Satisfaction with care among patients with non-metastatic breast cancer: development and first steps of validation of the REPERES-60 questionnaire

Version: 3 Date: 13 June 2007

Reviewer: Anne Brédart

Reviewer's report:

As reported in a previous message (more than one week ago), I agree with the amendment authors made to their paper. The reading of this paper is much clearer. Authors present a relevant questionnaire, adequately developed and evidencing good psychometric properties. So this paper may be published as such.
