Reviewer’s report

Title: A novel BRCA-1 mutation in Arab kindred from east Jerusalem with breast and ovarian cancer

Version: 4 Date: 6 January 2007

Reviewer: Fernando Schmitt

Reviewer’s report:

The authors have definitely improved the article and corrected all the thorny issues raised by me. Table 1 was a grateful help in the understanding of the case study population and the article as it stands opens new horizons for future studies in this population.

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
