Reviewer's report

Title: Case report: PET/CT, a cautionary tale.

Version: 1 Date: 2 October 2006

Reviewer: Patricia Price

Reviewer's report:

General
Excellent case report from and excellent group. Concise and very readable. A very important case to report with good suggestions for causes of the malalignment. This report definitely needs to be in the public domain as there are lessons to be learned as this new technology is introduced.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
None

Discretionary Revisions (which the author can choose to ignore)
None

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable
