Reviewer's report

Title: Therapeutic effects of STAT3-decoy oligodeoxynucleotide on human lung cancer in xenograft

Version: 2 Date: 1 May 2007

Reviewer: Bart JL Eggen

Reviewer's report:

General
The manuscript was extensively rewritten and has significantly improved. The points I raised have been adequately answered and the additional expriments carried out have strenthened the paper.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)
A few typos in the manuscript, such as page 3: Rrestoration instead of Restoration; page 6: 30days instead of 30 days.

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
