Reviewer's report

Title: Influence of IFN-gamma and its receptors in human breast cancer

Version: 3 Date: 9 June 2007

Reviewer: David Chang

Reviewer's report:

Authors have reasonably addressed the concerns raised. I suggest some additional change with headers in "Result Section". Each header in result section should be a summary sentence of the result of the paragraph rather than using the method. For example, the header should not be "Immunohistochemical staining", rather it should be finding from the staining.....

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
