Reviewer's report

Title: Increased interferon alpha receptor 2 mRNA levels is associated with renal cell carcinoma metastasis

Version: 4 Date: 20 April 2007

Reviewer: Christopher J Kane

Reviewer's report:

General

--------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

--------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

--------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
