Reviewer’s report

Title: FRA-1 protein overexpression is a feature of hyperplastic and neoplastic breast disorders

Version: 2 Date: 27 October 2006

Reviewer: Karin Milde-Langosch

Reviewer’s report:

General
In their revised manuscript, the authors addressed nearly all critical points. Therefore, I recommend to publish it in its present form.

--------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

--------------------------------------------------------------------------------------

Page 9, line 6: Instead of “In a limited number of samples..” the authors should give the exact number of samples.

--------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Page 9, line 6: Instead of “In a limited number of samples..” the authors should give the exact number of samples.

--------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
I declare that I have no competing interests.
