Reviewer’s report

Title: An integrated analysis of genes and pathways exhibiting metabolic differences between estrogen receptor positive breast cancer cells

Version: 4 Date: 15 June 2007

Reviewer: Steven Van Laere

Reviewer’s report:

The manuscript has improved substantially. The validation of the results using microarray data from human breast tumour samples is an important an essential addition.

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
