Reviewer's report

Title: Docetaxel Weekly Regimen In Conjunction With RF Hyperthermia For Pretreated Locally Advanced Non-small Cell Lung Cancer, a Preliminary Study

Version: 2 Date: 3 September 2007

Reviewer: pierluigi granone

Reviewer's report:

General

------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached).

editorial concerns regarding trial registration have been poorly addressed (see comment above), so it is a matter of editorial policy to accept the justification given for the lack of official registration of the trial and take a final decision regarding acceptance (this is why I put "unable").

------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

none

------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

none

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
