Reviewer's report

Title: A new molecular breast cancer subclass defined from a large scale real-time quantitative RT-PCR study

Version: 2 Date: 5 February 2007

Reviewer: Robert B Clarke

Reviewer's report:

General

-------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

I believe it is a suitably revised manuscript and therefore suitable for acceptance

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
