Reviewer's report

Title: Polymorphisms cMyc-N11S and p27-V109G and Breast Cancer Risk and Prognosis

Version: 2 Date: 23 March 2007

Reviewer: Hiltrud H Brauch

Reviewer's report:

General

--------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

This manuscript still needs a thorough focus in the discussion.
Delete all speculative parts including
Discussion paragraphs 2 (despite our failure...), 4 (This is not surprising...) and 5 (Lastly we present...)

--------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Quote references a author et al. throughout the ms (example Ma et al see introduction)

--------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
