Reviewer's report

Title: Utility of 18F-fluorodeoxyglucose emission tomography/computed tomography fusion imaging in combination with ultrasonography for axillary staging in primary breast cancer

Version: 3 Date: 9 May 2008

Reviewer: Christian Cohade

Reviewer's report:

The authors responded correctly to all the comments. I do not have any major compulsory, minor essential or discretionary revisions to submit.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
