Title: Prognostic value analysis of urokinase-type plasminogen activator receptor in oral squamous cell carcinoma: an immunohistochemical study

Version: 2 Date: 25 June 2008

Reviewer: Juan Carlos C de Vicente

Reviewer’s report:

Authors have considered the recommendations that I have previously sent to BioMed Central. I think that the data analysis is right and the problems observed with text and tables have been solved. They have used a chi-squared and Mann-Whitney tests, and they have modified accordingly the Table II. English language should be improved (for instance, in the summary, we can read immunohistochemistry.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
