Reviewer's report

Title: A haplotype variation affecting the mitochondrial transportation of hMYH protein could be a risk factor for colorectal cancer in Chinese

Version: 3 Date: 26 August 2008

Reviewer: Haruhiko Sugimura

Reviewer's report:

Minor essential comments
1. Being aware of the preliminary nature of the study, the authors could add the concession clause for the sentence in the conclusion like
   Although preliminarily, these results suggest ....
2. The other part would be acceptable in general.
   The result of the functional study they showed here, in spite that the weight of the significance may be not so great, is an important effort in this field.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
