Reviewer's report

Title: The impact of comorbidity and stage on ovarian cancer mortality: A nationwide Danish cohort study

Version: 1 Date: 29 October 2007

Reviewer: Patricia Tai

Reviewer's report:

General
This is a well written report.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

nil

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

p10. 5th line: MMRs is a typo.
p12. middle of 2nd paragraph: "One reason this study did not find an association may be its adjustment for residual tumour, which may be an intermediate factor in the causal pathway between comorbidity and survival." Please explain this a bit more.
p12. "Similarly, an American hospital-based study reported an age-" needs to have a "," after age-.

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
Declaration of competing interests:
I declare that I have no competing interests.
