Reviewer's report

Title: Heat shock protein90 in lobular neoplasia of the breast

Version: 3 Date: 27 May 2008

Reviewer: David Ross Sibson

Reviewer's report:

Having read the resubmitted manuscript I believe the authors to have adequately addressed all of the points that I raised for initial manuscript. I have no further comments to make or questions to raise.

The question posed by the authors is well defined.
The methods are appropriate and well described.
The data is presumed sound.
The manuscript adhere to relevant standards for reporting and data deposition.
The discussion and conclusions well balanced and adequately supported by the data.
The limitations of the work clearly stated.
The authors acknowledge work upon which they are building.
The title and abstract accurately convey what has been found.
The writing is acceptable.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

 Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
