Reviewer's report

Title: Cyclooxygenase-2 overexpression is common in serrated and non-serrated colorectal adenoma, but uncommon in hyperplastic polyp and sessile serrated polyp/adenoma

Version: 3 Date: 19 December 2007

Reviewer: Kenichi Sugihara

Reviewer's report:

Discretionary Revisions
Page10: In this manuscript, it is not significant differences in COX-2 expression in the tumor location, but the following sentence is a trend towards more frequent COX-2 expression in tumors in the distal colon than those in the proximal colon. Why is the meaning of content of these two sentences different?

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
