Reviewer's report

**Title:** Prognostic significance of Hypoxia-Inducible Factor 1 alpha (HIF-1alpha) expression in advanced poorly differentiated serous ovarian cancer: an immunohistochemical study

**Version:** 2  **Date:** 27 May 2008

**Reviewer:** Joachim J. Fandrey

**Reviewer's report:**

I think the authors have adequately addressed my concerns and made changes according to my suggestion.
They should carefully check for formatting errors on p 14 and the "alphas" throughout the text.

I have no further comments and recommend acceptance of the MS.
