Reviewer's report

**Title:** Effects of small interfering RNA targeting thymidylate synthase on survival of ACC3 cells from salivary adenoid cystic carcinoma

**Version:** 5  **Date:** 29 October 2008

**Reviewer:** Carlos Ciudad

**Reviewer's report:**

Cut down the discussion from 6 pages, back to 4 at the most. For a manuscript with 2 pages in the results section there is no sense to have a discussion of 6 pages. Discussion could be more concentrated, directed and short to the point.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

'I declare that I have no competing interests'
