Reviewer's report

**Title:** Endothelin Receptor B Antagonists Decrease Glioma Cell Viability Independently Of Their Cognate Receptor

**Version:** 2  **Date:** 4 October 2008

**Reviewer:** Tetsu Akiyama

**Reviewer's report:**

Although the concerns highlighted by Referee 3 are reasonable, there is useful information here regarding the effects of ETRB on gliomas and melanomas which does not involve ETRB inhibition. This may be of some importance to people working in this area.
