Reviewer's report

Title: Flow-cytometric monitoring of disease-associated expression of 9-O-acetylated sialoglycoproteins in combination with known CD antigens, as an index for MRD in children with acute lymphoblastic leukaemia: a two-year longitudinal follow-up study

Version: 2 Date: 9 January 2008

Reviewer: giuseppe gaipa

Reviewer's report:

This last revisions have addressed most of the points raised earlier. Although the question Q4 was partially addressed we think the author’s answer is satisfactory in its complex.

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
