Reviewer's report

Title: Facile whole mitochondrial genome resequencing from nipple aspirate fluid using MitoChip v2.0

Version: 3 Date: 8 March 2008

Reviewer: Clare Isacke

Reviewer's report:

In the revised version of this manuscript, authors have addressed all the comments raised in my original review.

My only comment (a minor one) is that it would help the reader if the authors could expand their abbreviation list. For example, what are GG1, STR, NIST, rCRS etc.

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
