Reviewer’s report

**Title:** The anticancer activity of lytic peptides is inhibited by heparan sulfate on the surface of the tumor cells

**Version:** 2  **Date:** 17 February 2009

**Reviewer:** Klaus Brandenburg

**Reviewer’s report:**

The only point which might be critical is the assessment of the MTT test, which is doubted by various colleagues to produce unequivocal results. Perhaps the authors should consider an further confirmation by an alternative test.

**Declaration of competing interests:**

I declare that I have no competing interests nor do I know anyone of the authors.
