Reviewer's report

Title: Induction of protective and therapeutic anti-pancreatic cancer immunity using a reconstructed MUC1 DNA vaccine

Version: 2 Date: 5 May 2009

Reviewer: Zhiguo Liu

Reviewer's report:

Rong Y et al provided explanations to reviewer raised questions. Though not totally sound, the study might still worth publishing. However, results and discussions should be revised accordingly to make sure readers will understand there are methodological flaws in this study in case of any confusion in the future. Authors should be very careful about the expression and language issue. In the response letter, they make mistakes on simple words like "explanation".

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
