Reviewer’s report

Title: Pancreatic cancer-related cachexia: influence on metabolism and correlation to weight loss and pulmonary function

Version: 3 Date: 16 March 2009

Reviewer: robert marsh

Reviewer’s report:

I believe that the authors have made the necessary revisions to the manuscript that now allows it to be published. It is much more explicit and the conclusions are valid based on the data presented. I would suggest a final read through by a native English speaker as the grammar is still a little rough.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
