Reviewer’s report

Title: Overexpression of human sperm protein 17 increases migration and decreases the chemosensitivity of human epithelial ovarian cancer cells

Version: 4 Date: 1 April 2009

Reviewer: Dimcho Bachvarov

Reviewer's report:

The authors have given satisfactory responses to most of my comments, although their arguments for the unsuccessful in vivo experiments in nude mice using the hSp17-expressing cell line (due to absence of sufficient cancer cells overexpressing HSp17 in transplanted tumor of mice) are not very convincing. Otherwise, the manuscript still needs some corrections in style and grammar.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
