Reviewer's report

Title: Association of common variants in mismatch repair genes and breast cancer susceptibility: a multigene study.

Version: 2 Date: 15 July 2009

Reviewer: Karen Curtin

Reviewer's report:

The authors have taken care to satisfactorily address this reviewer's recommended compulsory and discretionary revisions in this revised manuscript, and the quality of the English translation is significantly improved. The study adds to the literature regarding the role of common variants in mismatch repair genes and non-familial breast cancer.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
