Reviewer’s report

Title: Bioelectrical impedance phase angle in clinical practice: implications for prognosis in stage IIIB and IV non-small cell lung cancer

Version: 3 Date: 10 December 2008

Reviewer: Ingvar Bosaeus

Reviewer’s report:

The questions raised have been adequately addressed and the manuscript has been revised accordingly. I have only very minor comments:

Line 115: The sentence in brackets could be removed or changed to refer to the now published breast cancer study (ref. 33), as has been made on line 213.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
